

# Think green

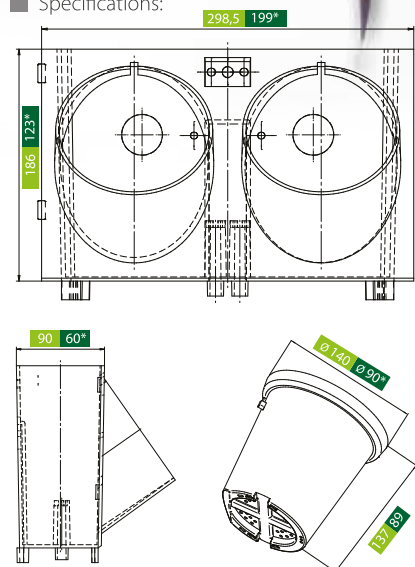

## Vertical gardens system

Pixel Garden is a unique system of constructing vertical gardens, popularly called the floral walls. They perform not only decorative but also functional role. They can be used for constructing the vertical gardens, for example in the form of partition walls, sound barriers, fences or hoardings. Pixel Garden is setting new standards in designing the space with the use of living flora, implementing freshness, aroma and colors in the surrounding.

The set consists of the box and two flowerpots planted in it. The elements are designed in the way, which enables to construct whole flower walls with the unique idea of irrigation.

The Pixel Garden vertical gardens offer enormous possibilities of arrangement. Flowers in small pots, like the pixels, compose colorful pictures. They allow to create diverse color variations, blooming mosaics, floral inscriptions and sophisticated patterns with spectacular visual effect.

### Specifications:

Model	Size	Quantity per 1m <sup>2</sup>	Diameter of the pots
PG 14	186 x 298,5 x 90 mm	18 Pc	140 mm
PG 09	123 x 199 x 60 mm *	40 Pc	90 mm

Material: PP PE HDPE Color : Gray/ other colors can be custom-made

Product protected by a patent application.
